## Euthanasia

You have a number of options for euthanizing the Indian Mynas you catch:

- Ask your local Vet if they would be willing to euthanize the birds for you (see below).
- Cervical dislocation (breaking the neck) – this is only recommended for those who are experienced and confident to euthanize birds in this way.

### Agreed Euthanasia Points for Indian Myna Birds

Please ensure that you call first, and make sure cage is covered whenever transporting birds. You should also consider putting a tarp or towel under the cage to protect your car.
